## Book Description (annotation)..

*The Celestial Journey of the Soul* explores the astrological dimension of the Gospel of Mark. The individual sections were originally given as sermons in the Dublin Unitarian church during the solar year March 2007 – March 2008. Apart from the thematic parallels with the Zodiac, the narrative is both perceptive and pragmatic, offering a range of universally edifying life-lessons, and insightful personal guidance.

## From the rear cover..

According to the author, the Gospel of Mark is structured on the zodiac, the sun's annual path through the sky, and each of the zodiacal sections of the Gospel contains profound teachings on the nature of the spiritual life. The book outlines these teachings and explores their contemporary significance. Darlison argues that the Gospel was not originally intended to be read as a historical text, but as a description of those stages through which every person must pass on his or her way to enlightenment or self-transformation.

Each essay is prefaced by the author's own translation of a relevant passage from the Gospel and (usually) by a story which reinforces the spiritual lesson.
